Senior Product Designer, **7+ years** designing data-dense interfaces for B2B & B2C SaaS: management dashboards, design systems, web & mobile flows. Human-Computer Interaction background, user research (interviews, testing), and an **AI-powered design workflow (Claude Code, Figma MCP)** that anchors every generation on the design system instead of prompting from a blank slate. I ship fast in close collaboration with engineers.

EXPERIENCE

Hustle Up · UX/UI Designer

Late 2024 — Present

Sport & fitness platform · multi-sided product (athletes, coaches, gym owners) · web & mobile

- Designed the **gym-owner management dashboard**: **~6 owner interviews** and **user testing** to prioritise real needs, business and activity data consolidated into a single cockpit with role-based access (financial / coach).
- Built the **design system** from a heterogeneous existing base: **44 documented components** on a semantic token layer, across **4 themes** (Athlete Light/Dark, Owner, Coach), integrated down to code with engineers.
- Built an **AI-powered design workflow**: mockup generation anchored on the design system and refined in the codebase with **Claude Code & Figma MCP**.
- Designed, on the athlete mobile app, onboarding (capturing information reused to personalise support) and the "fitness test" (assessing physical activity level), to engage athletes in the app and open a path toward coach follow-up, plus mobile booking and coaching features.
- Collaborated with another designer, 2 POs, the CEO, and web/mobile engineers.

ISYBUY · UX/UI Designer

2022 — 2024

White-label purchasing SaaS · B2B

- Harmonised interfaces through a **maintained design system**; led the navigation redesign across complex menus.
- Worked on **data-dense B2B views** and tracked product KPIs; extended the product line down to mobile.

IBAT · UX/UI Designer

2018 — 2022

B2B construction SaaS · web & field

- Designed **3 B2B SaaS apps** (procurement, time management), web and mobile, with **user testing** and a solid NPS.
- Designed for a **full chain of roles** on one platform: buyers (purchasing optimisation, **CSR criteria**, multi-criteria **sourcing**), site managers and team leads ordering from the field, and employee time-tracking under collective-agreement rules.
- Also held **mobile lead** and **front-end developer (CSS)** hats, guaranteeing design-to-code consistency and working hand-in-hand with engineers.

SKILLS

Product Design & data-dense UI · Dashboards & business interfaces · Design systems & design tokens · Wireframing → high-fidelity & prototyping · User research (interviews, usability testing, A/B, SUS) · AI workflow (Claude Code, Figma MCP) · Front-end awareness (CSS) · English B2

TOOLS

Figma (+ MCP) · Claude Code · Adobe XD · Useberry · Clarity · Hotjar · Jira

EDUCATION

MSc Computer Science — Human-Computer Interaction
Université Paul Sabatier & ENAC, Toulouse
2015 — 2018

BSc Computer Science
Université Bordeaux 1
2013 — 2015

INTERESTS

Hyrox & running — active bsport member · Strength training · Cinema · Cooking · Board games
